

English - Farmer Duck: what are they saying?

Did you notice that everytime the farmer asked “how goes the work?” Farmer Duck answered “quack”? What did the duck mean? Choose 5 (or more) jobs that the duck did and write the answer the duck is really saying for example “I’m bringing the cow up to the farm from the field. It is cold and wet and I’m tired”. Use the pictures below to remind you of the jobs Farmer Duck did.

Maths - Dividing by 5

Let's learn: Today we are going to divide numbers by 5. Watch the video and do the worksheet.

Practical Maths:

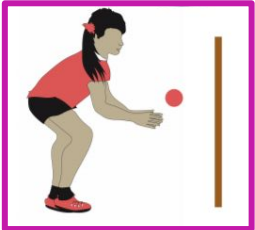

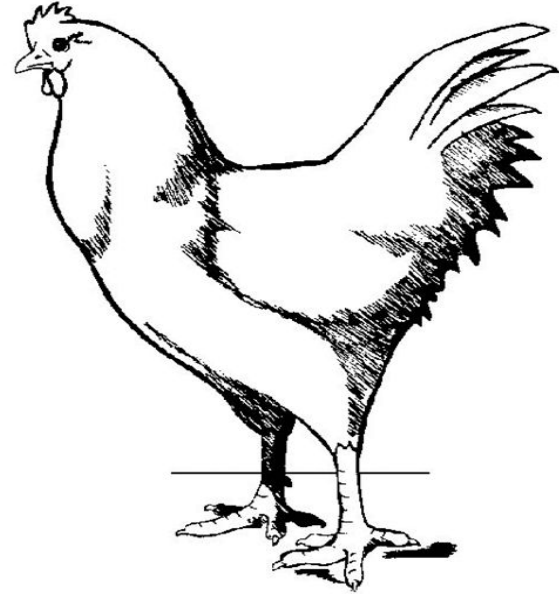

Find lots of gloves (don't worry if they don't match! Also them out then use them to make division calculations like: $20 \div 4 = 5$

Topic - Science: animals.

Let's have a closer look at a chicken to learn the names of the different parts of its body. Use the internet to research this (or maybe you've got a book at home which you can use?).

Task: write the correct label for each of the parts of the chicken.

Optional extension task: complete the second part of the worksheet to give three reasons why we know a chicken as a bird.

Physical challenge - Wall Ball!

How many times can you throw a ball against the wall and catch it in 60 seconds? Stand two steps away from the wall. If you drop the ball, carry on counting your score from where you left off. If you don't have a ball, use a rolled-up pair of socks! Good luck!

Can you beat your score from Week 4?
