

Separates a group of three or four objects in different ways, beginning to recognise that the total is still the same.

How many cars are in the car park?

Can you park the cars in a different way? How many cars are in the car park when you park them in different places?

- With a friend, take turns to place a car in to the car park.
- Count the total number of cars in the car park.
- How many cars are at the top of the car park? How many at the bottom?
- Drive the cars away and then back to the car park. Can you park the cars in different places? How many cars are there altogether?
