## Currency:

1 Norwegian Krone (NOK) = 100 ore

# Animals

In Norway, you will find reindeers. These animals are also called caribou. These animals which only live in the Northern Hemisphere above the Arctic circle travel far to get food. They have antlers which they use for scraping the snow away from the ground to find food. The animals have four toes. It is interesting to know, that reindeer are the only mammals that can see ultraviolet light!

Arctic foxes also live in Norway. Their coat changes with the seasons. In winter the fur is mainly grey and white, while in summer it changes to a light brown.
