Communication and Language

Today we are going to continue to practice hearing syllables in words and embed our understanding further.

Time to warm up our brains..... Listen the video below for some lovely examples of syllables for your child to join in with.

<https://www.youtube.com/watch?v=HKxAjCqc3wU>

Now for today's challenge:

Today we are going to sort syllables. Using the worksheet attached, cut out and sort the words into the correct column. You can work out which column the pictures go into by clapping or stomping the syllables. If you don't have a printer you can sort some items from around the house into four categories- 1 syllable, 2 syllables, 3 syllables., 4 or more syllables.

Maths

Today we are continuing with our story, "I Spy Numbers" by Jean Marzollo. This time we are looking closely at number 3 and 4. Start by recapping the first two pages of the story and press pause after you have listened to page 3 and then 4.

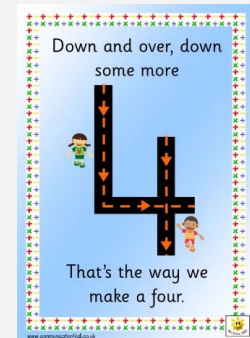

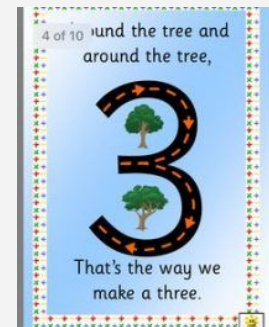

First, lets look closely at number 3. Talk to your child about the picture and what they can see. Can they find number 3 hidden in the picture? Remember, 3 is represented in different ways (3 hearts on the dice, 3 holes in the spatula, 3 pans with 3 pan handles, 3 wheels on the trike, 3 striped colours on the rope and so much more).

After lots of discussion, go and find things around your house that represent number 3- don't forget to keep your finds for tomorrow's activity..

Then, do the same for number 4. Think carefully about how number 4 is represented in the picture (4 strings on the guitar, 4 legs on the lizard, 4 prongs on the fork, 4 small stars on the flag and so much more). Then get searching around your house for number 4.

If you are enjoying this activity, feel free to move onto number 5 or 6 and progress through the book.

After your number hunt, practice writing the numbers 3 and 4. You can use the number rhymes on the right to help you form the numbers correctly.

Tuesday

Nursery Home Learning

Topic

Time for a fun afternoon of small world play! Get out your gritters from yesterday or any cars and trucks you have at home.

Get out the coloured pencils/pens and have fun drawing a map for your gritters to travel along. Why not set up a gritting station on your road map? You could use building blocks, Lego or any loose parts.

Then, once your map and station is set up, you will need some "grit". You could use crushed cereal, rice, oats or even sand to transport around your map. Don't worry about the mess, enjoy!

Remember, there are lots of benefits to play! Play allows children to use their creativity and imagination. Children often talk to themselves whilst playing and will often use the vocabulary they have recently learnt. Encourage new vocabulary, it's so important to talk and join in with play!

We would love to see your set ups! ENJOY!

Today's physical challenge!

Today we are going to enjoy another fine motor activity. Using a cooling rack from your cupboard and some ribbon, thread or string, have a go at weaving. Weave the ribbon, thread or string in and out of the cooling rack. This is trickier than it looks. It requires careful concentration!

Day 2 And finally...

We'd love to see what you've done today. Upload some pictures to your child's school 360 journal. Don't forget to email if you have any questions or concerns.
