

Activities for Early Years

<p>Be a detective and go on a shape hunt in your house, garden or on your daily walk with an adult. What shapes can you see? For example, a square window, a rectangle paving slab.</p> 	<p>Help an adult to make a cake or some biscuits. Your job is to help your grown up to measure out the ingredients. You can take a picture of this to show us. Most importantly, enjoy eating what you have made!</p> 	<p>Order your teddies/dolls from tallest to shortest. Take a picture of these to share.</p> 	<p>Use old plastic bottles to make skittles. Write a number on each skittle. How many can you knock over with one go? Can you add up your score?</p> 
<p>Learn a song with numbers in it. Perform your song and ask your grown up to record this for your teacher to see. See the link below for lots of song ideas.</p> <p>https://www.bbc.co.uk/programmes/p065s47t</p> 	<p>With a friend or family member, throw and catch a ball. Count each catch you make. If you drop the ball start again. Make this harder by setting a time limit.</p> 	<p>Use Lego or blocks to make a pattern. What pattern have you created? How many different patterns can you create? If you don't have Lego or blocks, try leaves, pebbles, petals etc.</p> 	<p>Write some numbers on used pots/boxes. Find the correct amount of items to put into each box/pot. Remember, the amount of items needs to match the number written on the pot/box.</p>
<p>Create eggs by cutting out ovals from pieces of paper. Your adult will write a number on each egg and you have to represent that number with pictures.</p> 	<p>Create a role play shop. Take it in turns to be the shop keeper. How many items will you sell? Can you identify some coins?</p> 	<p>Choose your favourite Number Blocks programme and watch this. What did you learn? You can watch more than one if you want to.</p> 	<p>Play some fun counting games using the link below. What was your favourite game?</p> <p>https://www.topmarks.co.uk/maths-games/3-5-years/counting</p>
