

Nursery Home Learning

Communication language and Literacy

Our final sounds activity for the week is going to be a fun one! For this activity you will need your instruments from Monday and some objects from around the house that can make sounds (box, keys, rattle, squeaky toy)

Today's job:

Having a good memory is really important and helps our mathematical development. So today we are going to use our memory in our phonics work!

Grown ups, play a sequence of sounds and get your children to copy the sounds in order.

Then change it up. Children, play a sequence of sounds and get your grown ups to copy.

Remember to listen carefully to check if your grown ups have missed any sounds from your sequence!

Mathematical Development

Our Learning: Let's continue to learn about shapes! Remember- don't just name the shapes, talk about their properties- how many corners does a triangle have? How many edges does a square have?.

Key vocabulary for the week: square, triangle, oblong/rectangle, circle, edges, corners

Today we are going to get crafty and make shape monsters!

Be as creative as you like! Can you make your monsters look silly, scary or just crazy and weird? Can you give them 5 circle eyes, 3 triangle eyes or even 4 oblong arms?

I can't wait to see your creations!

Wednesday

Nursery Home Learning

Topic

In the story we read yesterday, the child went out exploring the winter landscape with his grandma. Today I would like you to go on a long winter walk to explore the changes you can see from summer - Autumn - winter.

1. Take lots of pictures of the different things you can see - have the trees changed? What animals can you see? Are certain plants changing/growing more, what does the air feel like? How warm is it? What does the sky look like? What colours can you see?

*Save the pictures you have taken - you will need them later in the week.

2. As you walk collect different items- different coloured leaves, berries, pine cones -any winter offerings you can find. When you get home place them in a shallow container along with some string and add water.
3. Leave these out overnight - Make a prediction - What changes do you think you might see in the morning?

Today's Physical Challenge!

When out on your walk today, can you collect some large sticks - use some string and make these into some picture frames. Using any left over winter treasure items can you create a large scale physical winter transient art picture - the bigger the better?

Or could you use these sticks and make yourself a winter crown?

Day 3 And finally...

We'd love to see what you've done today. Upload some pictures to your child's school 360 journal. Don't forget to email if you have any questions or concerns.
